01 Cleanroom Comprehensive Solutions

With independent full industrial chain capabilities (design, construction, products, O&M), it is widely used in high-tech industries (electronics, aerospace, bioengineering, pharmaceuticals, precision machinery, chemicals, food, automotive manufacturing).

Electronic Information It has first-class domestic electronic semiconductor cleanroom technology, undertaking IC facilities for 12-inch, 8-inch and compound semiconductors

12-inch Wafer Fab

12-inch Wafer Fab

New Display Field Covers over 90% of leading flat panel display customers, supporting domestic development of TFT-LCD, OLED and other display industries

Gen 8.6 AMOLED Production Line Project

Smart Manufacturing Industrial Park Project

Healthcare and Wellness Has excellent design and construction teams in pharmaceutical engineering, helping customers build pharmaceutical facilities meeting China's new GMP, FDA and EMA requirements

Inhalation Aerosol Production Supply Base Project

Guangdong-Hong Kong-Macao Greater Bay Area Base Project

Chemical New Materials & New Energy

As China's first engineering company focusing on the electronic chemicals industry, it provides differentiated service models (chemicals + electronics, chemicals + pharmaceuticals, chemicals + purification, chemicals + new materials) to support the domestic breakthrough of the new materials industry.

Chemical New Materials Industrial Base Project

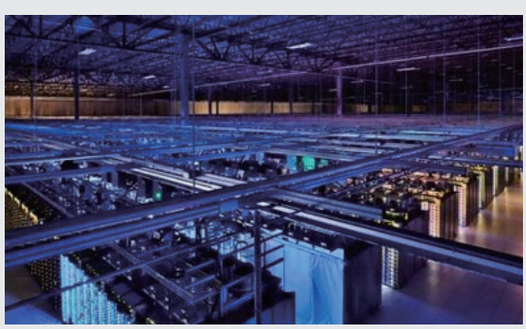

Automotive Soft-Pack Laminated Battery Project

Data Centers

Committed to infrastructure construction in data centers, command centers and smart buildings, it provides high-quality, comprehensive engineering and operation services for domestic and foreign government enterprises, operators, finance and research institutions.

Data Center Project

South China Digital Valley Project

Production Plants

With professional design, engineering and BIM teams, it has provided integrated engineering services for well-known domestic and foreign enterprises in automotive manufacturing, food manufacturing and aerospace.

Automotive Assembly Manufacturing Super Factory Project

Plant Relocation and Expansion Project
