02 Talent Cooperation

We are committed to building a global talent-cooperation ecosystem. Leveraging platforms such as the China-CEEC Vocational Education Alliance, we provide customized technical training and multilingual “Chinese + vocational skills” courses to help clients develop talent for digital-economy needs.

Master's and Doctoral Joint Training

Collaborating with international universities and clients to integrate cutting-edge R&D into talent development, creating a 'theory– practice–innovation' cycle through joint master's and PhD programs.

Overseas Training

Overseas training combines project-based learning with cross-cultural empowerment, leveraging international bases for hands-on technical exchange and cultivating professionals with both expertise and global vision.
